

This document is available to help you configure different devices, such as **Android** cell phones and tablets.

***It is not possible to give you a setup procedure for every device. These instructions may not apply exactly to your device, but will serve as a guide.***

Possible **Icons** Representing Wireless (Wi-Fi) Connection:

## Android

Here is the path to follow for your Android phone or tablet: **Settings** -> Wi-Fi

1. Go to Settings 
2. Choose your Wi-Fi connection : **csbe**  
(If your Wi-Fi is turned off turn it on).
3. Click or press the CSBE network or icon , then a menu will appear with the option «Oublier ce réseau» (**Forget** - it allows you to delete old information from this network).
4. Afterwards, you can reconnect to the CSBE network with a single click on the CSBE network:
5. Then select :

Méthode EAP : **PEAP**

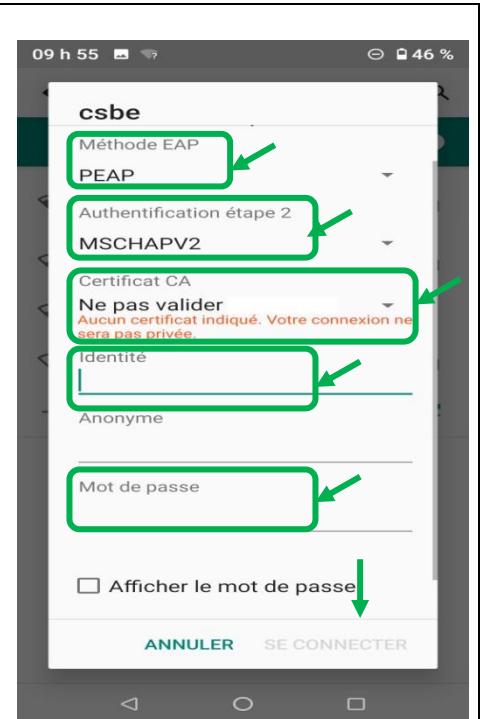

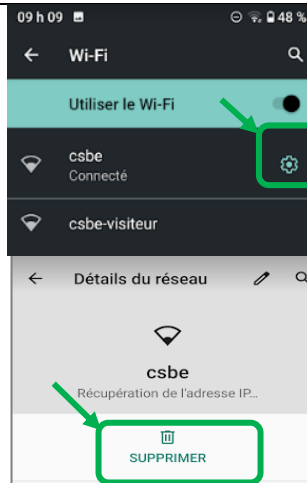

Authentification Phase (étape) 2: **MSCHAPV2** (this option is occasionally found in advanced options).

Certificat CA: **ne pas vérifier ou non défini** (**Do not validate** - In addition, a red warning message will appear indicating the following : **Aucun certificat indiqué. Votre connexion ne sera pas privée** (**No certificate specified. Your connection will not be private**). This message is normal.)

Utilisateur (username): your SCOL e-mail (**do not type @scol.qc.ca**). For example: jbedard33

Mot de passe (password): your student (card) number. Leave the other spaces empty.

6. If the word «Connecté» (connected) appears, it works.

### If it still doesn't work:

\* If you are still having difficulty connecting to the "csbe" wireless network, try all these steps again after restarting your device.

\* If you are still having difficulty connecting to the wireless network "csbe", we invite you to contact the IT Assistance Center (**service in French**), on 418 228 5541, extension 60000, to validate your connection information.
